Subject: Request to Preserve Records and Clarify Identifiers Related to Calls/Contacts

Deputy Roth,

I am writing to request preservation and clarification of records related to any calls-for-service, contacts, or incidents involving me and/or the following location **(In your Jurisdiction)**, whether occurring recently or over any relevant period, and any associated identifiers including (if applicable) case number(s), CAD event number(s), incident/report number(s), and unit assignments.

I am concerned that there may have been numerous calls or complaints over time may contain materially inaccurate statements regarding my conduct or may have been made in a misleading manner. To ensure accuracy and accountability, I respectfully request that any existing records connected to such calls or contacts be preserved, including CAD history/event logs, call-taker and dispatch notes (including MDT text entries), unit status histories (en route/on-scene/clear), body-worn camera recordings, and any associated audio recordings, to the extent such records exist and are retained under department policy.

If your office is not the appropriate point of contact for this request, please advise who is, and whether these matters fall under a specific division or unit for the West Hills/Woodland Hills area. I am requesting confirmation of the relevant identifiers and preservation of existing records only, and I am not requesting that any enforcement action be taken based solely on this correspondence.

Respectfully,

Kevin Perlman
